

Children's Future Support Fund: Introduction of Donation-type Vending Machines (Japan)

NSK has introduced a vending machine which makes donations to the "Children's Future Support Fund," a fund promoted by the Japanese Cabinet Office among other groups and organizations. This forms a part of "development of the next generation," which is a priority area for social contribution activities.

In FY2021, six vending machines were installed, bringing the total to 23 units. These vending machines will help efforts to alleviate child poverty and other issues, with a donation of 10 yen for each drink purchased. NSK donated a total amount of 1,669,310 yen in 2021.
