

BECAUSE EFFICIENCY IS EVERYTHING

IMPROVEMENT PAYS FOR ENDUSERS

Introducing NSK Your optimisation team

Optimising your machinery to add value to your business

As one of the world's leading manufacturers of rolling bearings, linear technology components and steering systems, NSK is found on every continent – with production facilities, sales offices and technology centres – because our customers appreciate short decision-making channels, prompt deliveries and local service.

Used to drive machinery and keep production lines running, bearings are an essential component of industry everywhere. Unfortunately, their critical importance is often overlooked with purchasing decisions based purely on price. In reality, the unit cost of a bearing represents just 15% of its cost over a lifetime. The other 85% comprises the cost of frequent replacement, breakdowns caused by poor specification, high energy costs from inefficient products and lost production because of downtime.

Each of these is a headache for engineers, line managers and procurement professionals the world over.

By specifying and sourcing the optimal bearing solution, you can reduce or eliminate these problems completely. With the increasing complexity of machinery, the challenge lies in identifying the optimal solution.

As a business, our whole focus is on improvement, and with AIP we turn this focus into optimising your machinery and equipment to bring you added value and long-term benefits including cost savings and increased productivity.

This is our commitment to you.

We've invested significant resources into taking our AIP programme to the next level – and we're confident that, by working together, we can help take your business to the next level also.

The AIP Value Cycle Proving that improvement pays

Partnering you towards machine optimisation

Our AIP Added Value Programme is based around a simple proposition: 'improvement pays'. By working with you throughout the AIP Value Cycle, we will help you achieve improvements in machine reliability, productivity and performance, all of which carry a tangible and measurable cost benefit – and we have the tools to prove it! That's what we mean by improvement pays.

A customised solution which identifies and quantifies the improvements and savings you'll make

AIP has been an integral part of NSK's offer for many years and is proven to deliver results across all industry sectors worldwide. It's a powerful and practical programme which goes beyond simply the supply of bearings, to the delivery of a cycle of continuous improvement – the AIP Value Cycle. As part of our own commitment to improvement, we've recently enhanced AIP with additional services – including condition monitoring – to add even more value.

Combining NSK's expertise in bearings with your in-depth insight, AIP is a truly collaborative approach. This results in a customised programme which identifies and quantifies the benefits you'll experience – not as vague promises, but in terms of real cost savings. We put a value to the improvements we deliver in terms of performance, productivity and maintenance costs, helping you to save time and money and maintain a competitive edge.

Step 1 – Evaluation: We make site visits to gather data and understand the customers' challenges.

Step 2 – Recommendation: We use our learning, knowledge and experience to create a solution, including anticipated savings for the customer.

Step 3 – Implementation: We can assist, if required, with the installation and testing of our recommended solution and, if appropriate, we can also refine it for improved operation.

Step 4 – Validation: We monitor performance to ensure the anticipated results are being delivered.

Step 5 – Extension: We collate data, share learning and look to expand the service to new applications.

AIP SERVICES

Surveys

- Stores survey
- > Workshop survey
- > Process map
- Bearing cross-referencing

Training

- > Product training
- Application of NSK bearings
- > AIP training
- Industry-specific training

Selection

- > Application reviews
- Machine design support
- OEM part conversion
- Diagnostics

Inspection

- Bearing condition analysis
- Failed bearing analysis
- > Lubrication analysis
- Material and dimensional analysis

HOW AIP DRIVES IMPROVEMENT FOR YOU

AIP success story

A large energy producer faced frequent failures on their water recirculation centrifugal pumps.

Evaluation

Working with a local distributor, we performed an investigation which revealed that failure was caused by the lubrication of the pump bearings.

We undertook a 6-month trial on three pumps. Within this time, there were zero failures, so we proceeded to full implementation.

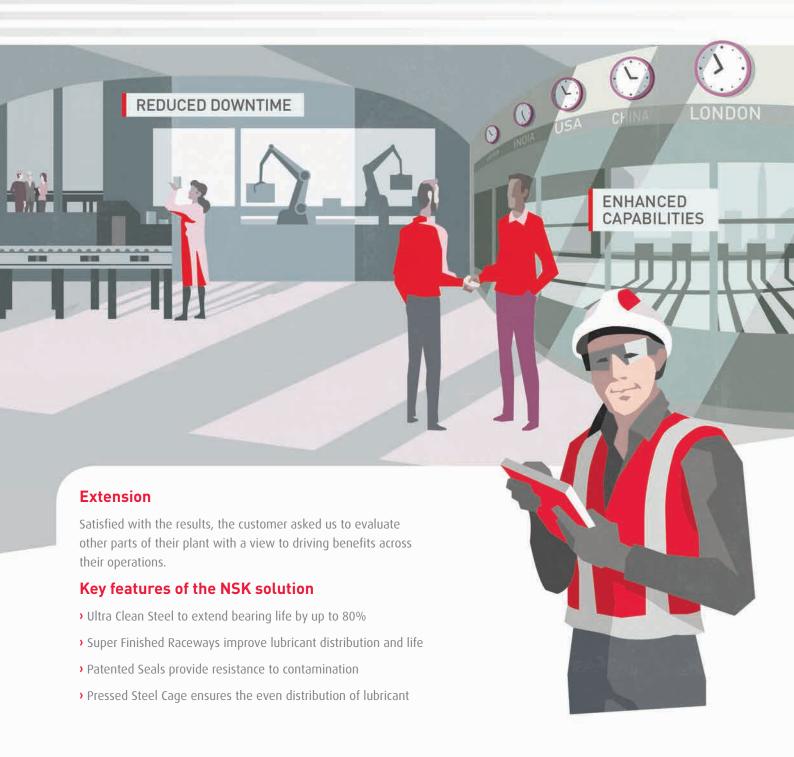

Validation

After changing to the NSK solution, there were no failures within the first 12 months, resulting in cost reduced purchasing and maintenance costs.

	Previous Solution	New NSK Solution
Bearing cost	€1,550	€480
Oil	€1,700	€0
Maintenance	€7,200	€0
Downtime	€19,000	€0
Total	€29,450	€480

Recommendation

We suggested NSK DDU Sealed Deep Groove Ball Bearings and a high temperature grease.

A continuous journey of improvement

A continuous journey of improvement

As a business, we're working to get better in everything we do, every day and everywhere. Our commitment to improvement is comprehensive, collaborative, and continuous.

Comprehensive

We look to improve in everything we do – from the quality of products and our AIP programme to the way we support our end-users across industry and developing your people.

Collaborative

We work together with our distributors and their customers. Teamwork and partnership is a key part of our philosophy.

Continuous

Improvement is a journey without an end destination. It never stops. And we never stop looking for better ways of supporting you.

As a business, our focus is on improvement – for our people, for our distributors and for you. It's a core philosophy and it's written into our vision and values. It ensures that together, we're stronger and fitter to face tomorrow's challenges.

AIP captures our philosophy and defines our whole approach to improvement. It's also a visible expression of our commitment to working with you in a beneficial partnership. Making small changes to your bearings can have a major impact on your whole business, and AIP is the best vehicle for realising improvements in terms of your equipment, productivity, people and financial performance. Focussed on your business objectives, it helps you create a brighter and more sustainable future – and that's what makes it so important. **Improvement pays.**

Refine, adapt, enhance

Always looking to add value, we work continually to develop and improve our products and services to ensure we deliver the latest in state-of-the-art solutions.

Sustainable improvements for your future

Our focus isn't simply on a quick-fix and immediate gain – it's about incremental and sustainable improvement to deliver long-term benefits.

Start improving with AIP today

AIP is a proven and practical tool that delivers real cost-savings and performance improvements. It works across all sectors, so get in touch and experience the benefits today.
